

Capacitance Decade Box

Capacitance Resolution 100pF, Absolute Maximum Capacitance Measurement 10.1111 μ F

Model: DC05

Product Details

ELC Decade Capacitance Box

The ELC 1% decade capacitance box can be adjustable via a rotary control.

This box uses polystyrene and polypropylene capacitors offering high-accuracy, a low-temperature coefficient (125ppm/ $^{\circ}$ C) and high-insulation resistance.

This is robust, easy to install and has robust switches with metal frame and gold-plated contact.

Features and Benefits

- Five decades are 100pF, 1nF, 10nF, 100nF and 1 μ F
- Outputs on each decade via 4mm safety sockets
- Discharge pushbutton
- Capacitance resolution is 100pF
- Maximum voltage rating is 300VDC or 230VAC 50Hz until 1000Hz

Certifications

EN 61010-1

ANSI/ESD S20.20:2014

BS EN 61340-5-1:2007

Address : 77 High Street#09-11, High Street Plaza, Singapore. 179433
