

Green Power is the Leading Electronic Instruments company based in Singapore. We never stop improving products' quality and extending our activities to more electronic products. Our QC system provides quality assurance based on your requirements for all of our products. We guarantee prompt delivery and a profitable business for you. Green Power should be your most economical choice. GreenPower

PLC Trainer S71200

Model: S7-1200 D8A2

1. PLC	S7-1200
2. Input DIO	8
3. Output LEDs	8
4. Analog input	4
5. 0 to 10V Generator	1
6. 4 to 20mA Generator	4
7. Aux Digital Input	2
8. Digital Pulse Input	1
9. Backup PSU	24V

Training system PLC-Trainer 1200

The "PLC-Trainer 1200" training system is based on a stable aluminum frame.

For signal input there are 8 push/latch switches and for analog value output 2 potentiometers for voltage adjustment (e.g. actual/set point value) 0-10V/DC and 4 to 20mA integrated.

The signal output is indicated by 8 LEDs (status). The "Learning cards" field can be used to place and test learning experiments. All 34 supplied tasks with solutions are structured according to the principle of "light to heavy". It is also possible to plug plug-in modules such as motors, traffic lights, cubes, etc. as well as models onto a 24-pin interface connector.
